Phagwara, Punjab

SUMMARY

ML Engineer (pre-graduation) with hands-on experience building and shipping production-grade NLP pipelines, LLM-based agent systems, and learned ranking models. Proven ability to design experiments, measure outcomes with offline and online metrics, and iterate fast. Seeking ML / Research Engineering internships at teams where models go to production.

SKILLS

Languages: Python, SQL, C++

AI/ML: PyTorch, TensorFlow, Scikit-learn, NLP, OpenCV, FAISS, RAG, LLMs, RL, Transformers, Fine-tuning

MLOps & Deployment: Hugging Face, Docker, Git, W&B, Experiment Tracking, CI/CD, Model Serving

Cloud & Infra: GCP (Vertex AI), Redis, Celery, Prometheus, FastAPI, REST APIs

Data & Viz: Pandas, NumPy, SciPy, EDA, Feature Engineering, Power BI, Matplotlib

Databases: PostgreSQL, MySQL, MongoDB, Vector DBs (FAISS, Pinecone)

PROJECTS

VidyaVerse | Python, FastAPI, FAISS, LightGBM, RAG, Redis | [GitHub](#) Mar'26 – Present

- Engineered a FAISS-backed NLP retrieval pipeline using sentence-transformer embeddings, NER intent extraction, and RAG across 6 live ingestion sources; lifted Precision@5, Recall@5, nDCG@5, and MRR from 0.33 to 1.0 as measured by offline benchmark evaluation on 366 indexed opportunities.
- Deployed a LightGBM learned ranking model with 24-hour auto-retraining and staged rollout gates; achieved 58% improvement in ranking acceptance rate and 153% lift in apply-rate as measured by Two-Proportion Z-tests across 332 impressions in 2 live A/B experiments.

LPU Smart Campus | Python, FastAPI, OpenCV, PostgreSQL, Redis, MongoDB | [GitHub](#) Jan'26 – Mar'26

- Shipped an OpenCV-based face verification system with multi-frame liveness detection and anti-spoofing, integrated across 210 API routes and 14 modules via Redis pub/sub; reduced manual attendance processing time by 40% for 200+ concurrent users as measured by module-level operational audit logs.
- Architected a dual-persistence backend (PostgreSQL and MongoDB) with Redis caching, Celery async workers, and Prometheus error-budget tracking; sustained 99.5% SLO across 210 API routes as validated by a CI pipeline enforcing 56 pytest files, Ruff linting, and Bandit security audits.

Incident Commander | Python, FastAPI, OpenEnv, LLM Agents, Docker | [GitHub](#) Apr'26 – May'26

- Designed a dense reward-shaping RL environment with structured state/action spaces and seeded anti-overfitting task variants; heuristic agent scored 0.925 and Llama-3.1-70B scored 0.865 average across 4 deterministic SRE incident scenarios as measured by trajectory-based grading.
- Built a reproducible LLM benchmarking framework deployed on Hugging Face Spaces with judge replay demos; quantified per-scenario business stakes from 8,400 to 230,000 simulated affected users as measured by per-task grader scores in [0.0, 1.0].

EXPERIENCE

Open Source Contributor | GirlScript Summer of Code (GSSoC) May'26 – Present

- Authored and merged 10 pull requests across 3 production AI repositories reviewed by project maintainers; delivered FastAPI schema validation, Pydantic auth middleware, MongoDB query operators (\$exists, \$regex), compliance lifecycle tests, and React/TypeScript UI components.
- Shipped session auth for an AI-GRC compliance platform, query operator extensions for a distributed vector database, and inference pipeline fixes for a computer-vision safety assistant, all merged to main within active sprint cycles.

Data Analyst Intern | Eastern Coalfields Limited (Govt. of India) | [Certificate](#) Jul'25 – Aug'25

- Identified and resolved data quality issues across 3 SAP enterprise reporting pipelines, improving downstream accuracy by 15% as measured by error rate in monthly executive reports, by applying statistical validation and systematic dataset optimisation.
- Engineered Power BI dashboards with automated SAP data refresh, cutting report generation from 8 hours to 90 minutes per week as measured by team time logs; enabled self-serve analytics for 4 non-technical business units.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional | [Oracle](#) Jul'25
- Databricks Accredited Generative AI Fundamentals | [Databricks](#) May'25
- Oracle Cloud Infrastructure 2025 Certified Data Science Professional | [Oracle](#) Jul'25
- Oracle OCI AI Vector Search Professional | [Oracle](#) Mar'25

ACHIEVEMENTS

- Rank 2, LPU, AlgoUniversity Graph Camp. Top 50 of 40,000 applicants. | [Certificate](#) Dec 2025
- Dean's List, Top 10%, Lovely Professional University | [LPU](#) Present

EDUCATION

Lovely Professional University | B.Tech, Computer Science Engineering | CGPA: 8.0/10 Aug'23–Present
